Art Unit: 2829

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 77-85, drawn to apparatus, classified in class 324, subclass 765.
- II. Claims 86-89, drawn to apparatus, classified in class 324, subclass 765.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination can be made without the leads configured to twist the projection into the component contact during movement as described in claim 86. The subcombination has separate utility such as having any size and shape that does not retain the component contact in a centered location as described in claim 77.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2829

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. A telephone call was made to the Office of the Attorney of Record on June 14, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. A shortened statutory period for response to this action is set to expire one month(s) from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
